

A woman wearing a white hard hat and safety glasses, with a yellow high-visibility vest over a white shirt, is looking at a tablet. The background is a blurred industrial setting with various digital overlays, including a world map, charts, and data points, all in a blue and white color scheme.

# Digital Manufacturing Solutions & Services

[www.cimlogic.co.uk](http://www.cimlogic.co.uk)

**CIM** LOGIC

**Cimlogic offer complete Digital Manufacturing Solutions and Services to leading manufacturers worldwide: improving efficiency and maximising productivity, whilst ensuring optimum performance and fast ROI.**

### What challenges do we help solve?

Cimlogic help manufacturers increase productivity and efficiency and reduce costs across all areas of manufacturing.

From measuring OEE to managing energy consumption, addressing quality issues and managing maintenance processes.

Cimlogic help manufacturers collect and analyse data from across the manufacturing process. The data is utilised for root-cause analysis of issues, enabling informed, accurate and real-time decision making to support business goals and drive actionable improvements.

### How do we work?

#### ENSURING SUCCESS WITH RAISE™

Cimlogic use our client-centric methodology (RAISE™) to understand and solve client challenges and ensure that our solutions deliver real business value.

We take our clients through every stage of the RAISE™ process, ensuring maximum return on investment whilst establishing a long-term trusted partnership.

We aspire to be an integral part of our clients' continuous improvement journey, helping manufacturers engage with technology and adding value every step of the way.

# Our Solutions

Developed on the TrakSYS™ platform from Parsec Corp, Cimlogic offer MES modules from OEE to Quality/SPC, Maintenance to Inventory. Out-of-the-box MES functionality designed to provide the monitoring, measuring, reporting and analytics you need to run your manufacturing operation more effectively.

- **OEE** - Cimlogic's automated OEE solution collects information on production downtime, short stops and speed losses, providing visibility into the effectiveness of plant machinery and processes needed to make measurable productivity improvements. [Learn more](#)
- **Maintenance** - including reactive maintenance, asset management and preventive maintenance. Cimlogic's maintenance solution helps manufacturers meet production schedules, reduce downtime, reduce repair costs and improve productivity. [Learn more](#)
- **Quality** - addressing issues such as reducing rework and production waste, improving quality control, reducing the impact of product recall, and meeting regulatory compliance. Cimlogic's quality management solution facilitates continuous improvement across all these areas, reducing costs and improving productivity and compliance. [Learn more](#)
- **Inventory** - supporting manufacturers in managing warehouse space (eg more space for finished goods by optimising raw material inventory) and reducing costs by reducing unnecessary inventory stock. Cimlogic's solution includes tracking cost of spares, measuring metrics such as inventory turns (stock in, stock out), managing the cost of inventory, understanding optimum stockholding levels, and analysing cost of stock consumed per asset. [Learn more](#)
- **Energy** - supporting global manufacturers in improving efficiency, reducing waste and achieving sustainable manufacturing. Cimlogic's mobile energy management solution gathers contextualised energy usage whilst enabling real-time alerts to empower corrective action and proactively manage carbon reduction. [Learn more](#)

## Cimlogic offers operational technology solutions in the following areas:

- **SCADA IIoT** - Cimlogic's SCADA IIoT expertise, combined with Ignition SCADA IIoT by Inductive Automation® helps you easily control your processes, and track, display and analyse your data. [Learn more](#)
- **Edge to Cloud** - data reporting and visualisation of key production processes and equipment, turning OT data into valuable business insights. [Learn more](#)

## Cimlogic provide predictive manufacturing and data analytic services utilising machine learning and predictive modelling techniques:

Today, leading manufacturers are reaping the benefits of machine learning and other technologies to gain greater insight across the supply chain, contextualising their system data and supply chain information to support rapid, accurate decision-making and forecasting. [Learn more](#)

# Support Services

## Tailored managed service agreements for improved business continuity

Manufacturing companies often face challenges regarding the support and upkeep of their manufacturing IT systems, which can lead to unpredictable costs and concerns around keeping the plant running and secure.

Cimlogic offer 24/7, global peace of mind with guaranteed service levels and access to subject matter experts in MES, OT and Operational Excellence. Underpinned by best practice ITIL procedures, Cimlogic protects their clients' manufacturing IT investments.

Cimlogic's wide experience with global manufacturers within industries such as food and beverage, consumer packaged goods and life sciences, means we know where problems in processes are likely to occur, stepping in to address the root causes that slow you down.

Cimlogic provides complete solutions for the manufacturing industry, now and in the future. [Learn more](#)

*"DuPont chose Cimlogic because of their deep technical knowledge of the TrakSYS™ product. Cimlogic also work closely with DuPont to meet the company's strict requirements and expectations for a service contract to support the installed TrakSYS™ base. We look forward to having Cimlogic as a journey partner as we expand TrakSYS™ across the enterprise."*

**- David Werner, Global Program Manager, DuPont**

Cimlogic is the sole UK integrator and Gold Partner for TrakSYS™ MOM software, designed and developed by Parsec Automation Corp.

Discover how Cimlogic works in close partnership with clients on their digital journey; delivering smart manufacturing solutions, end-to-end digital enterprise integration and digital transformation strategies.
